

The "Worked As" column gives the name/designation used in the original article. If the object was subsequently named, the "Current Name" column gives the name currently in the MPCORB file. The page number gives the first page of the article in which the object appears. Only those references that include lightcurves, other photometric data, and/or shape/spin axis models are included.

Number	Worked As	Current Name	Vol-Num	Pg #	Authors
1	Ceres		42-2	94	Melillo, F. J.
